

Ques. Add List Items?

- **Append method:-** add an item to the **end of the list**, use the `append()` method.

```
thislist = ["apple", "banana", "cherry"]  
thislist.append("orange")  
print(thislist)
```

Output:- ['apple', 'banana', 'cherry', 'orange']

- **Insert method:-** The `insert()` method inserts an item at the *specified index*.

```
thislist = ["apple", "banana", "cherry"]  
thislist.insert(1, "orange")  
print(thislist)
```

Output:- ['apple', 'orange', 'banana', 'cherry']

- **Extend method:-** The `extend()` method does not have to append lists, you can **add any iterable** object (tuples, sets, dictionaries etc.).

```
thislist = ["apple", "banana", "cherry"]  
tropical = ("mango", "pineapple", "papaya")
```

```
thislist.extend(tropical)  
print(thislist)
```

Output:- ['apple', 'banana', 'cherry', 'mango', 'pineapple', 'papaya']
